AN EXCLUSIVE EVENT:

# DEVELOPING TRUSTWORTHY AI

with Phaedra Boinodiris, IBM Consulting's global leader for Trustworthy AI, and moderated by David Fulford, Chief Executive Officer at IPAC

Artificial intelligence (AI) is already having a profound impact on our daily lives. AI systems are already in place in a vast number of operations, enhancing human expertise, and optimizing workflows. These systems are opening up opportunities for employees to focus on higher-value work, thus improving overall efficiency.

But can we trust AI and the decisions it is making? What systems need to be in place to check the moral and ethical dilemmas created by AI? This talk will introduce listeners to tangible steps that organizations and practitioners across diverse roles can take to develop truly responsible AI.
